Thank you Cliff. That is correct. We will share the draft permits with you.
Thanks, Barb

Hello Barbara,

I did not respond to Brian's last email that he had sent after we talked on the phone. I just wanted to confirm that I did let the water group know that EPA will transmit the draft Class II UIC permits for Catalyst and Sandstone shortly. The Seneca Nation understands the permits will be in draft form and not finalized.

Thank you and please call or email with any questions.

Cliff,

Thank you for helping to coordinate the consultation meeting today and taking my call afterwards. As we discussed, EPA will transmit the draft Class II UIC permits for Catalyst and Sandstone shortly. We want to ensure the Seneca Nation understands these permits are in **draft** form and not finalized and we are committed to the continued consultation process and possible submission of comments and subsequent response to those comments. Roughly a week after

transmitting these draft permits to the Seneca Nation we will proceed with issuing a public notice on the draft permits to gain perspective from the public. Changes to the draft permit can still occur and again, we welcome submission of comments from the Seneca Nation and we will continue to work through the consultation process. Please let Barb Okorn know if you have any questions or comments on this.

Take care and looking forward to catching up in August.

Brian Hamilton
